

Advice, Equipment, Tools, Machinery, Vehicles, and a little taste of Yesteryear

We have it all! A one stop shop for information and advice.

Farmers with sheep should not miss our **Sharpening Combs and Cutters** talk on Friday at the shearing shed.

However, all attendees at the Fair should make time to sit in on one of the demonstrations by **Martin from Murraylands Fire and Safety**. He will be informing you of the different types of **Fire Extinguishers** and what they are to be used for. This will be followed by a demonstration on correct technique for using them. He will also demonstrate how to use a **Fire Blanket** to put out a fire. There will be a display of Fire Extinguishers and Martin will be more than happy to answer any of your queries. The demonstrations will happen on both days, just check your program for the times to ensure you don't miss them. After all, what good is a Fire Extinguisher in an emergency if you don't know how to use it or it has not been maintained correctly?

With over 300 other sites we have all the trade categories you'll need covered as well. Tools, machinery, equipment, vehicles (past and present), field bins, fodder, supplements and much much more.

We've even got your leisure activities covered with bikes, boats and beer!

Vintage cars will take you back in time before you time warp even further back with our blacksmith and blade shearing displays.

So, definitely something for everyone at this year's Karoonda Farm Fair.

Fair goers enjoying the Blacksmith Demonstrations at last year's Karoonda Farm Fair.
